Office Action Summary	Application No. 10/030,636	Applicant(s) HAMBERGER ET AL.	
	Examiner Alexander Thomas	Art Unit 1772	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/9/05 has been entered.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 8-13, 16 and 17, drawn to a product.

Group II, claim(s) 14 and 15, drawn to a process.

Evidence of lack of unity between the two groups is found in Gulik et al wherein it is found to disclose the features of claim 8. It would have been obvious to one of ordinary skill in the art to vary the shape of the tile to have two long sides and two shorter sides. As such, the special technical features of the claimed invention are not found to define a contribution over the prior art.

Art Unit: 1772

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. During a telephone conversation with Mr. Wrist on July 25, 2005 a provisional election was made with traverse to prosecute the invention of Group I, claims 8-13, 16 and 17. Affirmation of this election must be made by applicant in replying to this Office action. Claims 14 and 15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-13, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gulik et al ('592). Gulik et al disclose a parquet tile 1 which has its edges coated with a material to prevent moisture penetration; see the Figure and column 3, lines 17-27. However the reference does not disclose the claimed shape of the strip, i.e. elongated. It would have been obvious to one of ordinary skill in the art to vary the shape of the tile in Gulik et al to an elongated shape, in view of the teaching at column 4, lines 27-28 of Gulik et al wherein it is disclosed to vary the shape of the tile, in

Art Unit: 1772

order to provide a desired decorative effect (claims 16 and 17). Concerning claims 8-13, the reference discloses placing a plurality of tiles on a substrate and joining them edge to edge; see column 1, lines 4-9. This structure reads on the instantly claim "element" which comprises a plurality of strips arranged on a support. The process limitation regarding "rolling or spreading" a material does not provide any patentably distinguishing features to the final article.
